25X1

1. The munitions depot of the Hajmasker (D 79) range hitherto consisted of a number of 80 m. x 25 m. wooden barracks, with concrete floors, located at a small valley (called Horhos) which is adjacent to the range.
2. The depot was recently rebuilt. Still at the same location, the depot consists of eight concrete constructions 80 m. x 25 m. which are sunk to a depth of 6 m. below the surface of the ground. Each of the structures has a capacity for 20 carloads of ammunition. It is estimated that the total capacity of the depot (160 carloads) provides sufficient ammunition for 2½ months, providing there is no increase in the present rate of firing.
3. The depot area is surrounded with three-fold barbed wire fence. The guard consists of 14-man shifts.
